DIGITAL AFFILIATE ACADEMY

30-Day Affiliate Site Builder Course

Your step-by-step plan to go from a niche to a live, content-ready affiliate site in 30 days.

- ✓ Week 1: Foundation — set up your site correctly from day one
- ✓ Week 2: Content — write articles that rank and attract visitors
- ✓ Week 3: Monetization — affiliate links, email list and first funnel
- ✓ Week 4: Growth — analytics, social presence and your 90-day plan

Digital Affiliate Academy
digitalaffiliateacademy.com

This course contains affiliate links. See **Before You Begin** on page 1.

Before You Begin

Please read this page. It takes two minutes and it tells you exactly what this course is, what it is not, and what you are entitled to.

Affiliate links in this course

This course contains affiliate links, and you should assume I earn from them.

The course builds your website using **Wealthy Affiliate** and your email list using **Systeme.io**. The links to both are affiliate links. If you sign up through them and later upgrade to a paid plan, I may receive a commission at no extra cost to you.

Both tools have genuinely free plans, and **the free plans are enough to complete all 30 days.** You are never required to upgrade to finish this course. I recommend them because I use them, not because of the commission.

You are free to use any other website host or email platform you prefer. The daily tasks still apply; only the click-by-click instructions will differ.

What this course does not promise

This course teaches you how to build an affiliate website. It does not promise, guarantee or imply that you will earn any particular amount of money, or any money at all.

- Results depend entirely on your own effort, your niche, your market and factors outside anyone's control.
- Affiliate sites earn from search traffic, and search traffic takes months to build. Most sites that succeed begin to see consistent income somewhere between months six and twelve, and many never do.
- The 30-day timeline describes the structure of the course. It does not mean you will earn income in 30 days, or at any other specific time.
- No income figures, earnings screenshots or typical results are claimed anywhere in this course, because there are none to claim.

Refunds: all sales are final

This is an instant-access digital product, so all sales are final and we do not offer refunds. The moment your payment is confirmed you have the complete product, which is why the policy works this way.

That puts the obligation on us, not you. The sales page lists in full what is inside before you buy, and we answer any question beforehand — email **support@digitalaffiliateacademy.com** and you will get a reply the same day.

If something has actually gone wrong — your download did not arrive, a link is broken, or you were charged twice — contact us and we will fix it. That is a service failure on our side, not a change of mind on yours.

Nothing here affects any statutory right you have that cannot be excluded by agreement. Where you are a UK or EU consumer, you consented to immediate delivery at checkout and acknowledged losing the 14-day cancellation right at that point.

Licensed to the purchaser for personal use. Not for resale or redistribution.

This is not professional advice

This course is for general educational purposes only. It is not legal, tax, accounting or financial advice, and it is not a substitute for advice from a qualified professional in your own jurisdiction. Rules on business registration, tax, advertising disclosure and data protection vary by country and change over time. Where the course tells you to set something up, it is your responsibility to confirm it meets the requirements that apply to you.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Your Responsibilities as a Site Owner

The course asks you to publish content, recommend products and collect email addresses. All three carry legal obligations. Here is what you need to know before you reach those days.

Disclosing your own affiliate links (Days 15 and 16)

If you recommend a product and earn a commission, you must tell your readers. In the UK this is required by consumer protection law and enforced by the CMA and the ASA. In the US the FTC requires disclosures to be clear, conspicuous and placed close to the recommendation itself.

- Put the disclosure where the reader will see it before they click, not only in your footer or on a separate page.
- Write it in plain language. "This article contains affiliate links and I may earn a commission if you buy through them" is enough. Vague wording like "sponsored content" is not.
- Disclose on every page that carries affiliate links, including your Resources page.
- Read the terms of each affiliate program you join. Many restrict where and how you may promote, and some prohibit paid search advertising or promotion inside downloadable products.

Collecting email addresses (Days 17 to 19, and Day 27)

An email address is personal data. If any of your subscribers are in the UK or the EU, UK GDPR and the EU GDPR apply to you regardless of where you are based, as do the PECR rules on marketing email.

- Collect consent properly. The person must actively opt in. Do not use pre-ticked boxes, and do not add people to your list because they bought something or filled in a different form.
- Say what you will send and how often, at the point of sign-up.
- Include a working unsubscribe link in every marketing email, and honor requests promptly.
- Link to your privacy policy from your opt-in form, and make sure that policy describes what you actually do with the data, who processes it and how long you keep it.
- Your email platform is a processor acting for you. You remain responsible for the data.

Your privacy policy (Day 4)

Day 4 suggests using a free privacy policy generator to get your site live. A generated policy is a starting point, not a finished document. Before you begin collecting email addresses on Day 18, read it through and make sure it describes your real practices and meets the requirements where you and your readers are based. If you are unsure, take it to someone qualified.

License and permitted use

This PDF is licensed to the individual who purchased it, for their own personal use.

You may print it and keep copies for yourself. You may not resell it, share it, upload it, give it away, or reproduce any part of it for anyone else, whether or not you charge for doing so. Copyright remains with Digital Affiliate Academy.

Welcome to the Course

You have already done the hardest part: you chose your niche. Now it is time to build the actual site. This course gives you a clear, actionable plan for every one of the next 30 days. No vague advice. No theory for its own sake. Just one specific task each day, in the right order, that moves you forward.

The two tools you will use throughout are Wealthy Affiliate for your website, hosting and training, and Systeme.io for your email list and simple funnels. Both have genuinely free plans and both are covered step by step inside the course.

How to get the most from this course

Work through one day at a time. Each day has a brief explanation followed by a short checklist. Tick off each action before moving to the next day. Most days take between 30 and 90 minutes. If you miss a day, simply pick up where you left off. Consistency matters far more than speed.

What you will have at the end of 30 days

- A live website set up correctly on your niche from day one
- At least 14 published articles targeting real search keywords
- Affiliate links placed naturally and compliantly within your content
- A working email opt-in connected to your Systeme.io list
- A 4-email automated welcome sequence live and running
- Google Analytics and Search Console tracking your progress
- A dedicated Resources page with your top recommendations
- A clear 90-day plan so you know exactly what to do next

This is not a finished, profitable business after 30 days. That takes longer and depends entirely on your effort. It is a properly built foundation that most beginners never manage to put in place at all.

Licensed to the purchaser for personal use. Not for resale or redistribution.

The 30-Day Plan at a Glance

Here is the full four-week structure so you can see where you are heading before you start day one.

Period	Focus	What you build
Week 1 **Days 1 to 7**	Foundation	WA account set up, domain registered, site live, core pages done, keyword research completed, first article published
Week 2 **Days 8 to 14**	Content	Six more articles published, internal links between all content, meta descriptions added, content audit completed
Week 3 **Days 15 to 21**	Monetization	Affiliate programs joined, links placed in content with disclosures, Systeme.io list live, opt-in page connected, 3-email sequence running
Week 4 **Days 22 to 30**	Growth	Analytics set up, social presence built, Resources page published, technical audit done, 90-day plan written

Licensed to the purchaser for personal use. Not for resale or redistribution.

WEEK 1 · DAYS 1 TO 7

Foundation

Set your site up correctly from day one

Week 1 · Foundation

This week is about getting every essential piece in place so you have a real, live site to build on. Work through each day in order and complete the actions before moving on.

DAY 1

Set Up Your Wealthy Affiliate Account

Create your free Wealthy Affiliate account at wealthyaffiliate.com. The free Starter account gives you everything you need for this first week including your first website, web hosting and beginner training. No credit card is required.

Affiliate link. I may earn a commission if you later upgrade to a paid plan. The free Starter account is all you need for this course and you are never required to upgrade.

Today's actions:

- [ ] Create your free Wealthy Affiliate account at wealthyaffiliate.com
- [ ] Complete your profile fully, add a photo and a short bio
- [ ] Complete the first training lesson inside WA (around 20 minutes)
- [ ] Write down your niche topic and the audience you are building for

DAY 2

Choose and Register Your Domain Name

Your domain is your website address. Keep it short, clean and memorable. You do not need to include your exact niche keywords. Something brandable and easy to spell is better than a long keyword-heavy URL.

You can register your domain through Wealthy Affiliate, which connects it to your site automatically, or through a registrar such as Namecheap.

Today's actions:

- [ ] Brainstorm five potential domain names for your niche
- [ ] Check availability and aim for a .com under 15 characters
- [ ] Register your chosen domain
- [ ] Connect it to your WA website if using an external registrar

DAY 3

Set Up Your WordPress Site

Wealthy Affiliate uses WordPress, the world's most widely used website platform. Once your domain is connected, you will install WordPress and choose a clean, simple theme.

Do not spend hours choosing a theme. Pick something clean and fast. You can change it later. Getting live matters more.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Today's actions:

- [ ] Install WordPress on your WA site using the WA setup wizard
- [ ] Choose and activate a simple, clean theme
- [ ] Set your site title and tagline under Settings and then General
- [ ] Delete the default Hello World post and Sample Page
- [ ] Set your permalink structure to Post Name under Settings and Permalinks

DAY 4 Set Up Your Four Core Pages

Before you publish any articles your site needs four essential pages. These are required for visitor trust, for Google to index your site properly, and for compliance if you ever run paid advertising.

A generated privacy policy is a starting point, not a finished document. Before you start collecting email addresses on Day 18, read it through and make sure it describes what you actually do with people's data, who processes it and how long you keep it.

Today's actions:

- [ ] Create an About page covering who you are and what your site is about
- [ ] Create a Contact page with a simple form or your email address
- [ ] Create a Privacy Policy page using a free generator online, then edit it to match your real practices
- [ ] Create an Affiliate Disclosure page stating that you use affiliate links
- [ ] Add all four pages to your main navigation menu

DAY 5 Keyword Research for Your First Articles

Before you write anything, find out what your audience is actually searching for. Use Jaaxy, the AI keyword research tool built into your Wealthy Affiliate account. Look for keywords with real search volume and manageable competition. You are not trying to rank for the biggest terms yet.

Today's actions:

- [ ] Open Jaaxy inside your WA account
- [ ] Search for your main niche topic and explore the keyword suggestions
- [ ] Find ten keywords you could write articles around
- [ ] Record each keyword with its monthly search volume and competition score
- [ ] Pick your top seven as the articles you will write this month

Licensed to the purchaser for personal use. Not for resale or redistribution.

DAY 6

Write and Publish Your First Article

Your first article does not need to be perfect. It needs to exist. Write a genuinely helpful piece around your first keyword, aimed at a complete beginner in your niche. Aim for 1,000 to 1,500 words. You can use Wealthy Affiliate's built-in AI writing tools to help with a first draft, but always edit it to sound natural and like you.

Today's actions:

- [ ] Write your first article (1,000 to 1,500 words) around keyword number one
- [ ] Include your target keyword in the title, the first paragraph and one subheading
- [ ] Add at least one image using Canva or the WA AI image tool
- [ ] Publish the article rather than leaving it as a draft
- [ ] Share it on one social platform such as Facebook, Pinterest or X

DAY 7

Week 1 Review and Prepare for Week 2

Take stock of what you have built in seven days and prepare for the content-heavy week ahead. Do not skip this day. The review habit is what separates people who keep going from people who drift.

Today's actions:

- [ ] Confirm your site is live and your first article is published
- [ ] Confirm your seven chosen keywords are written down and ready
- [ ] Read back through your first article and fix anything that reads awkwardly
- [ ] Set aside a writing schedule for the coming week

Licensed to the purchaser for personal use. Not for resale or redistribution.

WEEK 2 · DAYS 8 TO 14

Content

Write articles that rank and attract the right people

Week 2 · Content

Content is the engine of an affiliate site. This week you will publish six more articles, build your internal linking structure and complete your content foundation.

DAY 8 Write and Publish Article 2

Write your second article around keyword number two from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 2 around keyword 2 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Find one relevant affiliate product to mention naturally in the article

DAY 9 Write and Publish Article 3

Write your third article around keyword number three from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 3 around keyword 3 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Add an internal link from this article back to your Day 6 article

DAY 10 Write and Publish Article 4

Write your fourth article around keyword number four from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 4 around keyword 4 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Add internal links so all three published articles link to each other

Licensed to the purchaser for personal use. Not for resale or redistribution.

DAY 11

Write and Publish Article 5

Write your fifth article around keyword number five from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 5 around keyword 5 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Research one more long-tail keyword variation to add to this article

DAY 12

Write and Publish Article 6

Write your sixth article around keyword number six from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 6 around keyword 6 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Write a short meta description for each of your published articles

DAY 13

Write and Publish Article 7

Write your seventh article around keyword number seven from your research list. Same process as Day 6: 1,000 to 1,500 words of genuinely helpful content, clear structure with subheadings, at least one image, published on the site.

Today's actions:

- [ ] Write article 7 around keyword 7 (1,000 to 1,500 words)
- [ ] Include the keyword in the title, first paragraph and a subheading
- [ ] Add at least one image and publish the article
- [ ] Review all published articles and fix any spelling or grammar issues

Licensed to the purchaser for personal use. Not for resale or redistribution.

DAY 14

Week 2 Content Audit

You now have seven published articles. Step back and look at them as a set. Are they covering different angles? Do they link to each other sensibly? Is the writing quality consistent across all seven?

Today's actions:

- [ ] List all seven published articles with their target keywords
- [ ] Confirm every article has at least one internal link to another article
- [ ] Confirm every article has an image and a meta description
- [ ] Identify your best article so far as a priority to promote first
- [ ] Prepare keywords eight, nine and ten ready for Week 3

Licensed to the purchaser for personal use. Not for resale or redistribution.

WEEK 3 · DAYS 15 TO 21

Monetization

Affiliate links, your email list and your first funnel

Week 3 · Monetization

This week you will add affiliate links properly, set up your Systeme.io email list, build a simple opt-in page and write your first email welcome sequence. By the end of this week your site has everything in place to earn commissions, if and when your content starts attracting visitors.

DAY 15 Find and Join Affiliate Programs

Research the best affiliate programs for your niche. Look on ShareASale, CJ Affiliate, ClickBank and Amazon Associates for relevant products. Choose three to five programs whose products you can genuinely recommend and that pay a reasonable commission.

Read the terms of every program carefully. Many restrict where and how you may promote. Amazon Associates, for example, does not permit affiliate links in ebooks, PDFs or emails, only on your website. Breaching these terms is one of the most common ways beginners lose an account.

Today's actions:

- [ ] Research five or more affiliate programs in your niche
- [ ] Sign up to your top three choices
- [ ] Record your affiliate links and login details securely
- [ ] Read the terms of each program and note any promotion restrictions
- [ ] Note in particular any rules on paid search, email and downloadable products

DAY 16 Add Affiliate Links to Your Content

Go back through your published articles and add affiliate links where they fit naturally. The link should feel like a genuine recommendation within helpful content, because that is exactly what it should be. Never force a link.

Add your affiliate disclosure clearly at the top of every article containing affiliate links. This is a legal requirement in most countries. It must be somewhere the reader will see it before they click, not only in your footer or on a separate page.

Today's actions:

- [ ] Identify the three or four articles most suited to affiliate links
- [ ] Add links naturally within the content, not just at the very end
- [ ] Add an affiliate disclosure notice to every article that contains links
- [ ] Use plain language such as: this article contains affiliate links and I may earn a commission
- [ ] Click every link to confirm it tracks correctly

Licensed to the purchaser for personal use. Not for resale or redistribution.

DAY 17 Set Up Your Systeme.io Account

Systeme.io is where your email list will live. The free forever plan handles everything you need: contacts, unlimited email sends, a landing page and basic automation. No credit card is required.

Go to systeme.io and create your free account. Take 20 minutes to explore the dashboard before you start building.

Affiliate link. I may earn a commission if you later upgrade to a paid plan. The free forever plan is all you need for this course and you are never required to upgrade.

Today's actions:

- [ ] Create your free Systeme.io account at systeme.io (no card needed)
- [ ] Complete your account settings and profile
- [ ] Explore the Funnels, Emails and Automations sections
- [ ] Note the template library for use on Day 18

DAY 18 Build Your Email Opt-In Page

Create a simple landing page in Systeme that offers something free in exchange for an email address. This is your lead magnet. Keep it simple. A short guide, a checklist, or a useful resource list related to your niche is plenty.

An email address is personal data. If any of your subscribers are in the UK or the EU, data protection law applies to you regardless of where you are based. Consent must be active, not assumed.

Today's actions:

- [ ] Decide on your lead magnet (a short PDF guide, checklist or resource list)
- [ ] Build your opt-in landing page in Systeme using a template
- [ ] State clearly what you will send and roughly how often
- [ ] Link to your privacy policy from the form, and use an active tick rather than a pre-ticked box
- [ ] Connect the form to your email list inside Systeme
- [ ] Add the opt-in link to your WordPress site in a sidebar or after articles
- [ ] Test the opt-in by signing up with your own email address

DAY 19 Write Your Email Welcome Sequence

Every person who joins your list should receive an automated sequence of emails that introduces them to you and your site. This is the most valuable automation you will ever set up.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Write three emails: a welcome and delivery of the lead magnet, your story and what your site covers, and your top recommendation with an affiliate link.

Today's actions:

- [ ] Write Email 1: welcome the new subscriber and deliver the lead magnet
- [ ] Write Email 2: your story and what readers will find on your site
- [ ] Write Email 3: your top recommendation with a genuine affiliate link, clearly disclosed
- [ ] Confirm every email carries a working unsubscribe link
- [ ] Set up all three emails in Systeme with one-day gaps between each
- [ ] Test the full sequence by signing up with a second email address

DAY 20 Publish Articles 8, 9 and 10

Keep the content momentum going. Publish three more articles this week. By the end of today you will have ten published articles on your site, which is a real and meaningful content library.

Today's actions:

- [ ] Write and publish Article 8 (1,000 to 1,500 words)
- [ ] Write and publish Article 9 (1,000 to 1,500 words)
- [ ] Write and publish Article 10 (1,000 to 1,500 words)
- [ ] Add affiliate links where relevant in the new articles
- [ ] Add internal links connecting the new articles to older ones

DAY 21 Week 3 Review: Monetization Check

By now your site has ten articles, affiliate links in your content, a live opt-in page and an automated email welcome sequence. That is a functioning affiliate business built in three weeks.

Today's actions:

- [ ] Confirm affiliate links are live and tracking correctly in at least three articles
- [ ] Confirm every page with affiliate links carries a visible disclosure
- [ ] Confirm your opt-in page is live and connected to Systeme
- [ ] Confirm your three-email welcome sequence is set up and tested
- [ ] Check your Systeme dashboard to see if anyone has subscribed yet
- [ ] Note anything that needs improving before Week 4

Licensed to the purchaser for personal use. Not for resale or redistribution.

WEEK 4 · DAYS 22 TO 30

Growth

Scale your content, track what works and keep going

Week 4 · Growth

The final week is about building the systems and habits that keep your site growing after day 30. You will set up analytics, build a simple social presence and create a clear plan for the next 90 days.

DAY 22 Set Up Google Analytics and Search Console

You cannot improve what you cannot measure. Google Analytics shows you how many people visit your site and what they do when they are there. Google Search Console shows you which keywords you are ranking for and whether Google has indexed your pages. Both are free and take about 30 minutes to set up.

Today's actions:

- [ ] Create a Google Analytics account and add your site at analytics.google.com
- [ ] Install the Analytics tracking code using a plugin such as Site Kit
- [ ] Create a Google Search Console account and verify your site ownership
- [ ] Submit your sitemap to Search Console (usually yoursite.com/sitemap.xml)
- [ ] Check your privacy policy mentions analytics cookies if you are using them

DAY 23 Build a Simple Social Presence

Organic search is your main traffic strategy, but a social presence helps with indexing and gives you a place to share your content. Pick one platform your niche audience uses and set up a basic page or profile.

Pinterest works very well for lifestyle, food, home and hobby niches. Facebook works well for community-focused niches. Choose one and focus on it.

Today's actions:

- [ ] Create a Pinterest business account or a Facebook page for your site
- [ ] Add your website URL and a clear description of what your site covers
- [ ] Create simple pin or post graphics for your published articles using Canva
- [ ] Share or pin all ten of your published articles today

DAY 24 Write Articles 11 and 12

Keep the content rhythm going. Two more articles this week. By now you should be noticeably faster and more confident at the writing and publishing process.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Today's actions:

- [ ] Write and publish Article 11 (1,000 to 1,500 words)
- [ ] Write and publish Article 12 (1,000 to 1,500 words)
- [ ] Add affiliate links and internal links to both articles
- [ ] Share both on your social platform

DAY 25 Optimize Your Top Three Articles

Go back to your three most-read articles according to Google Analytics, or your three most comprehensive articles, and improve them. Better articles rank higher and convert better. Small improvements compound significantly over time.

Today's actions:

- [ ] Open Google Analytics and identify which articles have the most views
- [ ] For each of your top three: add more depth to any thin sections
- [ ] Check the keyword appears in the title, first paragraph and at least one subheading
- [ ] Improve the call to action at the end of each article
- [ ] Confirm the affiliate links in each article are working correctly

DAY 26 Add a Resources or Recommendations Page

A dedicated Resources page is one of the highest-converting pages on any affiliate site. It lists the tools, products and services you genuinely recommend with brief explanations and your affiliate links. People who visit this page are already in buying mode.

Today's actions:

- [ ] Create a new page in WordPress titled Recommended Resources or Tools I Use
- [ ] List five to ten products or services with a brief honest description of each
- [ ] Add your affiliate link to each item on the page
- [ ] Add your disclosure statement at the top of the page
- [ ] Add the Resources page to your main navigation menu

DAY 27 Expand Your Email Sequence to Four Emails

Add a fourth email to your Systeme welcome sequence. This one should be value-focused: a tip, a short guide or a useful resource, with a soft mention of your top recommendation at the end.

The goal of your email sequence is to build trust first and recommend second. Every email should give more than it asks for.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Today's actions:

- [ ] Write Email 4: a useful tip or short guide relevant to your niche
- [ ] End the email with a natural mention of your top affiliate recommendation, clearly disclosed
- [ ] Add it to your Systeme automation with a two-day gap after Email 3
- [ ] Test the updated sequence in Systeme to confirm it sends correctly

DAY 28 Speed and Technical Check

A slow or broken site loses visitors before they read a single word. Today is your technical audit day to find and fix the most common issues.

Today's actions:

- [ ] Run your site through PageSpeed Insights at pagespeed.web.dev and note the score
- [ ] Install a caching plugin such as WP Super Cache if you do not already have one
- [ ] Check every page loads correctly on mobile as well as desktop
- [ ] Run a free broken link check on your site
- [ ] Confirm every page has a meta description using a plugin such as Yoast SEO

DAY 29 Write Articles 13 and 14

Two more articles to close out the month. You are building a content library that will keep attracting visitors long after you publish each piece. Fourteen articles in 30 days is a genuinely strong foundation.

Today's actions:

- [ ] Write and publish Article 13 (1,000 to 1,500 words)
- [ ] Write and publish Article 14 (1,000 to 1,500 words)
- [ ] Add affiliate links and internal links to both
- [ ] Share both on your social platform

DAY 30 Your 30-Day Review and 90-Day Plan

You have made it to day 30. Take today to reflect on everything you have built, review honestly what worked and what was harder than expected, and write your plan for the next 90 days. The sites that succeed are the ones that keep going after day 30, not the ones that sprint and stop.

Licensed to the purchaser for personal use. Not for resale or redistribution.

Today's actions:

- [ ] List everything you have built over the past 30 days
- [ ] Open Google Search Console and check whether your articles are being indexed
- [ ] Write an honest assessment of what went well and what you would do differently
- [ ] Set a concrete target for the next 90 days: articles, email list size, income
- [ ] Block your writing time in your calendar for the coming month right now

Licensed to the purchaser for personal use. Not for resale or redistribution.

What You Have Built in 30 Days

A month ago none of this existed. Look at what you have now.

- A live affiliate website set up correctly from the very first day
- 14 published articles targeting real, researched keywords
- Affiliate links placed naturally and compliantly in your content
- A dedicated Resources page with your honest recommendations
- A Systeme.io email list with a working opt-in page
- A 4-email automated welcome sequence running without any extra effort
- Google Analytics and Search Console measuring your growth
- A social presence with all your articles shared and visible

What to focus on for the next 90 days

Publish two articles per week. Every week, without fail. That is the single most important thing you can do now. In 90 days you will have 30 or more articles and a growing email list. Whether that turns into income depends on your niche, your competition and factors none of us control, but nothing can compound if you stop publishing.

- Publish two new articles every single week without exception
- Send one email to your list every one to two weeks
- Add new affiliate links as you find new relevant products to recommend
- Check Search Console every month to see which keywords are gaining traction
- Update and improve your best performing articles every three months

WANT THE NEXT 90 DAYS MAPPED OUT, WITH TEMPLATES?

The 90-Day Affiliate Growth Accelerator

A 3-phase framework for the next 90 days, plus 6 ready-to-use templates: a 90-day content calendar, a 100-article ideas bank, an extended email swipe file, outreach templates, an SEO checklist and an income tracker. You still do the work; the framework and the templates mean you are not starting from a blank page.

See the 90-Day Affiliate Growth Accelerator ($497) at digitalaffiliateacademy.com

This is an optional further product from Digital Affiliate Academy. Nothing in the 30-Day course requires it, and the 30 days stand complete on their own.

Keep going.

Most affiliate sites that succeed do so between months 6 and 12, not in the first 30 days, and many never do. You have done the hard work of getting started properly. The job now is to keep going when it feels slow.

Questions about anything in this course? Email **support@digitalaffiliateacademy.com** and you will get an answer the same day.
